

Crop Image

1. Task Description

This Android application allows users to select an image from their device's gallery, crop it using an external cropping library, and store the cropped image in internal storage.

- **Select Image from Gallery:** Users can choose an image from their device's photo gallery.
- **Crop Image:** Users can crop the selected image to the desired dimensions.
- **Save Cropped Image:** The cropped image is saved to the device's internal storage for later access.
